Blood borne Pathogens

Blood borne pathogens are microorganisms in the blood or other body fluids that can cause illness and disease in people. These microorganisms can be transmitted through contact with contaminated blood and body fluids. When blood borne diseases are mentioned, most people think automatically of AIDS, but actually HBV, or the hepatitis B virus, is much more common. AIDS is usually fatal, though it may take years for symptoms to appear. HIV, the virus that causes AIDS, is primarily transmitted through sexual contact, though it may also be contracted through contact with contaminated blood or some body fluids. HBV attacks the liver, and is sometimes fatal. It is transmitted through saliva, blood and other body fluids.

Means of Transmission

Blood borne pathogens are transmitted when contaminated blood or body fluids enter the body of another person. This can occur through a number of pathways, such as:

- An accidental puncture by a sharp object contaminated with the pathogen. "Sharps" includes objects such as:

- ✓ needles
- ✓ scalpels
- ✓ broken glass
- ✓ razor blades

- Open cuts or skin abrasions coming in contact with contaminated blood or body fluids

- Sexual contact

- Indirect transmission (a person touches dried or caked on blood and then touches the eyes, mouth, nose or an open cut) (HBV only).

There are also many ways that these diseases are not transmitted. For instance, blood borne pathogens are not transmitted by touching an infected person, through coughing or sneezing or by using the same equipment, materials, toilets, water fountains or showers as an infected person. It is important that people are educated as to which ways are viable means of transmission of these dangerous diseases, and which are not.

STEPS TO TAKE IN THE EVENT OF AN EXPOSURE

1. Do not delay treatment for any reason.
2. If possible, immediately wash or flush the exposed area with soap and / or water.
3. Be sure to inform the personnel that the injury is an exposure to blood borne pathogens and / or a needle stick.
4. Report to the nearest hospital's Emergency Department.

I have read and understand the risks and precautions to take and what to do in case of exposure to Blood borne Pathogens.
